# The Swedish Preparations for the Next Framework Programme

Prague, 26th of Oct 2010

#### Magnus Härviden

Research Counsellor,
Permanent Represention of Sweden to the EU
[magnus.harviden@foreign.ministry.se]

Ministry of Education and Research Sweder

### Why the EU will need a strong R&D(&I) program

#### The World in 2025:

- Population
  - Population growth in 2025 up to 8 billion worldwide
  - 61% of world population in Asia, in EU just 6,5%
  - 35% of the European population will be more than 60
- Economic power
  - A doubling of world production by 2025 but 30% of world GDP produced by Asia, EU: 20%
  - Asia will also be the first world exporter (EU 32%, Asia 35%)
- R&D capacity
  - Asia will be on par with the US and Europe in the field of R&D

## Some early Swedish contributions

- Council Conclusions (2009)
- Lund declaration on Grand Challenges (2009)
- Conference on the Knowledge Triangle in Gothenburg (2009)
- Book on 'Priority Setting in the Framework Programme' (2009)

Ministry of Education and Research Sweder

### **Starting point for consultations**

- Every public authority was invited to create their own work and reference group for the preparations
- Radical changes to the structure and format should be considered (while realising that continuity will be appreciated by FP participants)
- Stakeholders should consider both the EU dimension and national priorities
- Possible synergies between the FP and other mechanisms should be explored

### **Providing food for thoughts**

- Questions to stakeholders
  - which, if any, major systematic changes are needed for the next FP?
    - should the current thematic approach be abandoned in favour of responding to the Grand Challenges?
  - how should we achieve synergies between higher education, research, innovation and cohesion policy through the FP and other EU programs?
    - should innovations be part of FP8 or separate like CIP today? What should the balance be between EU and national/regional level for innovation support? Should bottom-up initiatives like ERC also have special programmes for the use of the research results?
  - what should the balance be between programmes and projects?
    - Should the FP go from projects and calls to more programs (like JTI, article-185 etc)? What should be the role of Joint Programming in FP8?
- All contributions are to be written in English

### **Road map**

- Consultations and meetings with stakeholders (industry, universities, funding agencies, government offices, research institutes and more) began in May 2010, with the most intense phase in Aug-Oct
- Written contributions deadline in early October (so far 79 proposals!)
- A pow-wow on October 21
- Political approval in November
- Non-paper in late November or early December

### **Expected important issues**

- The relation of FP to national activities/needs
- How to tackle the Grand Challenges
- Synergies with other policy areas -Knowledge Triangle
- Instruments
- Simplification
- International scientific cooperation
- ERC, Mobility and Research Infrastructures
